Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Customer Problem Statement Template:

The project focuses on the standard laptop requester and the IT procurement process. The statements below are derived directly from the supplied problem statement and user story.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	an employee requesting a standard laptop	get my standard laptop configured promptly	the configuration step can be delayed or overlooked	the current process involves manual handling and lacks automation	frustrated and made to wait longer
PS-2	a member of the IT procurement team	process standard laptop requests efficiently	manual task creation and assignment can cause delays and errors	standard laptop requests require configuration after ordering	concerned about delays and inefficient use of IT resources

Project Problem Statement

Consolidated statement

Standard laptop requests currently require manual handling of configuration tasks after ordering. Because configuration can be overlooked or delayed, users may experience longer waiting times and the IT department may spend additional effort on manual task creation and assignment.

Desired outcome

Use ServiceNow Flow Designer to automatically create a catalog task after approval, set the configuration short description, and assign the task to the Hardware team so that configuration work begins promptly.
