Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Empathy Map Canvas

The following map is grounded in the supplied project problem statement and user story. It focuses on the experience of a user requesting a standard laptop and the related IT procurement interaction.

WHAT DOES THE USER THINK & FEEL?		**WHAT DOES THE USER SEE?**
• Wants the laptop to be configured promptly • Is concerned about waiting time • May feel frustrated when configuration is delayed • Values a seamless request experience	**STANDARD LAPTOP REQUESTER** Service Catalog Request	• Service Catalog request process • Request approval status • Requested Item record • Catalog Task status
WHAT DOES THE USER HEAR?		**WHAT DOES THE USER SAY & DO?**
• Receives information about the request and approval process • Interacts with IT/procurement support when waiting or following up		• Places a Standard Laptop order • Waits for approval and fulfillment • Expects configuration before use • May follow up when the process is delayed

PAIN	**GAIN**
• Delayed configuration • Manual processing and assignment • Longer user waiting time • Potential oversight or error	• Faster configuration workflow • Automatic task creation • Hardware team receives the task directly • Reduced manual intervention

Key insight

From the project

The user experience improves when an approved Standard Laptop request automatically produces a configuration task and routes it to Hardware. This directly supports the project goals of reducing waiting time, manual intervention, and inefficient resource allocation.
