Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	29 September 2026
Team ID	SWTID-2026-3672
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Standard Laptop Request	Submit a Standard Laptop request through the Service Catalog with the required request information.
FR-2	Approval Processing	Process the Requested Item through approval and continue when the approval state is Approved.
FR-3	Automatic Catalog Task Creation	After approval, Flow Designer creates a Catalog Task using the Requested Item record.
FR-4	Hardware Assignment	Set Assignment group to Hardware and short description to Laptop need to Configured.
FR-5	Task Visibility	Make the generated Catalog Task visible under the Requested Item for verification.
FR-6	Laptop Configuration Fulfillment	Hardware team works on the generated task and completes the standard laptop configuration.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The request process should be simple; automation removes manual task creation and assignment.
NFR-2	Security	Use ServiceNow roles, access controls and approval rules; the configured flow can run as a System user.
NFR-3	Reliability	An approved Standard Laptop request should consistently produce the required Catalog Task.
NFR-4	Performance	Event-driven automation reduces manual handoffs and waiting between approval and task creation.
NFR-5	Availability	The workflow operates within the ServiceNow platform when the service catalog is available.
NFR-6	Scalability	The same automated flow can process repeated Standard Laptop requests without manual task creation.
