Project Design Phase-II

Technology Stack (Architecture & Stack)

Date	29 September 2026
Team ID	SWTID-2026-3672
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Technical Architecture:

ServiceNow Service Catalog and Flow Designer automate the Standard Laptop procurement task from an approved Requested Item to Hardware.

Table-1 : Components & Technologies

S.No	Component	Description	Technology
1	User Interface	How the user submits and tracks the Standard Laptop request.	ServiceNow Service Catalog / Service Portal
2	Application Logic-1	Logic for creating and processing the catalog request and Requested Item.	ServiceNow Service Catalog
3	Application Logic-2	Logic that starts after the Requested Item is approved.	ServiceNow Flow Designer
4	Application Logic-3	Creates the fulfillment Catalog Task and sets its fields.	Create Catalog Task action
5	Database	Stores request, Requested Item, approval and Catalog Task records.	ServiceNow platform data store
6	Cloud Database	Cloud-hosted application data used by the platform.	ServiceNow cloud platform
7	File Storage	No dedicated file-storage component is required.	Not required
8	External API-1	No external API is required for this workflow.	Not required
9	External API-2	No external API is required for this workflow.	Not required
10	Machine Learning Model	The solution is rule/flow based and does not use machine learning.	Not used
11	Infrastructure (Server / Cloud)	Deployment and workflow execution are provided by the ServiceNow platform.	ServiceNow cloud platform

Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Table-2: Application Characteristics

S.No	Characteristics	Description	Technology
1	Open-Source Frameworks	No separate open-source framework is required for the described ServiceNow configuration.	ServiceNow platform / Flow Designer
2	Security Implementations	Use roles, ACLs, approval controls and controlled flow execution.	ServiceNow roles, ACLs, approvals
3	Scalable Architecture	The event-driven flow can process repeated Standard Laptop requests without manual task creation.	Flow Designer + Service Catalog
4	Availability	Workflow is hosted within the ServiceNow platform and does not require a separate local server.	ServiceNow cloud platform
5	Performance	Automatic task generation reduces manual handoffs and processing delay after approval.	Flow Designer automation

References:

ServiceNow implementation is based on the supplied Standard Laptop Flow Designer project concept.
