Project Design Phase

Problem – Solution Fit Template

Date	29 September 2026
Team ID	SWTID-2026-3672
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Problem – Solution Fit Template:

Problem: Standard laptop orders in an IT environment can require repeated manual steps, such as reviewing requests, creating service tasks, assigning them to the appropriate team, and tracking fulfillment. This can increase processing time and lead to inconsistent task creation or assignment.

Solution: Use ServiceNow Flow Designer to automate the Standard Laptop catalog-order process. When a Standard Laptop request is submitted, the flow can process the request and automatically create the required catalog task and assign it to the appropriate IT or procurement team.

Customer / User: Employees requesting a standard laptop and the IT/procurement team responsible for fulfillment.

Expected Fit: The solution addresses the manual processing problem by providing a consistent, automated workflow for Standard Laptop requests in ServiceNow.

Purpose:

❑ Automate Standard Laptop request processing using Flow Designer.

❑ Reduce repetitive manual work for IT and procurement staff.

❑ Create and assign the required catalog task consistently.

❑ Improve request tracking and fulfillment workflow.

❑ Provide a standardized process for recurring laptop orders.

Template:

Problem: Manual and repetitive processing of Standard Laptop requests.
Solution: ServiceNow Flow Designer automation.
Trigger: Standard Laptop catalog request submission.
Automation: Process request details → Create Catalog Task → Assign IT/Procurement team → Track and complete task.
Outcome: Faster, consistent and traceable Standard Laptop procurement workflow.
