| **Date** | 29 September 2026 |
| **Team ID** | SWTID-2026-3672 |
| **Project Name** | Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer |
| **Maximum Marks** | 2 Marks |

## Proposed Solution Template:

| S.No. | Parameter | Description |
|---|---|---|
| 1 | **Problem Statement (Problem to be solved)** | Standard laptop orders in ServiceNow can involve repetitive manual work such as reviewing requests, creating catalog tasks, assigning them to the appropriate IT or procurement team, and tracking fulfillment. This can increase processing time and cause inconsistent request handling. |
| 2 | **Idea / Solution description** | Implement a ServiceNow Flow Designer flow for the Standard Laptop catalog item. When a user submits a Standard Laptop request, the flow processes the request, creates the required Catalog Task, assigns it to the appropriate IT/procurement team, and supports task tracking through completion. |
| 3 | **Novelty / Uniqueness** | The solution replaces repeated manual processing with a standardized automated workflow connected directly to the Standard Laptop catalog item. The Process Engine can use the created Flow instead of separate manual automation steps. |
| 4 | **Social Impact / Customer Satisfaction** | Employees receive a more consistent and trackable laptop-request process, while IT staff spend less time on repetitive task creation and assignment. This can improve transparency and reduce delays caused by manual processing. |
| 5 | **Business Model (Revenue Model)** | This solution is intended for internal IT service management. It does not require a direct customer-payment model; its value comes from reducing operational effort and improving the efficiency of IT procurement and service fulfillment. |
| 6 | **Scalability of the Solution** | The Flow Designer approach can be extended to other standard IT catalog items such as desktops, monitors, keyboards, software requests, and other equipment. Additional conditions, approvals, assignments, and fulfillment actions can be added as the organization grows. |
